Start with a fish base, mt. folded in half.

- ① Hinge-fold small flap (back and forth.) Repeat behind.
- ② Fold peak down, parallel with bottom edge. Repeat behind, matching up new edges. Unfold.
- ③ Lift small flap and open it.
- ④ Pull down flap on the crease made in step 2.
- ⑤ Crimp sides almost but not quite to vertical. Repeat steps 3-5 on back.
- ⑥ Fold tip of flap up into model. Rb.

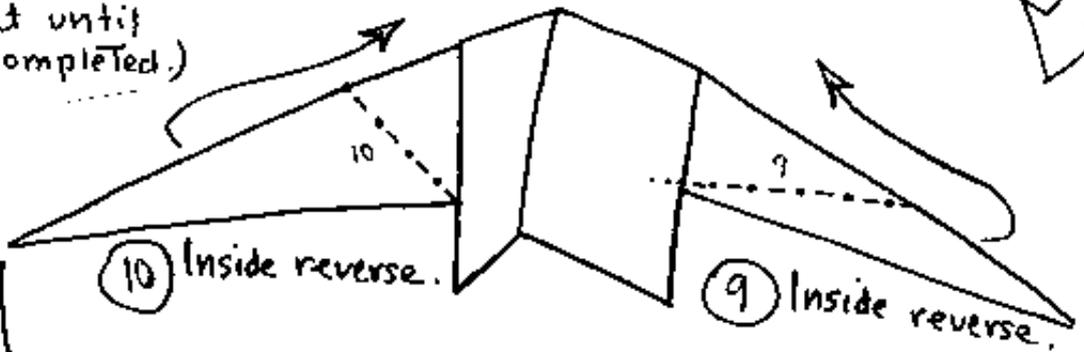

Brontosaurus, p.2

7 Holding top (colored) layer and inner (white) layer together, radial-pleat. Repeat behind: these two moves form a crimp. (Model will not lie flat until crimp is completed.)

8 Make a "membrane" fold. (On inside, narrow and squash.) Repeat behind.

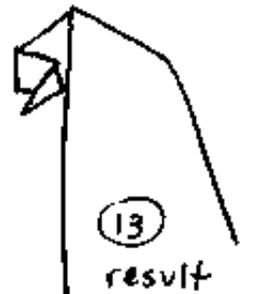

10 Inside reverse.

9 Inside reverse.

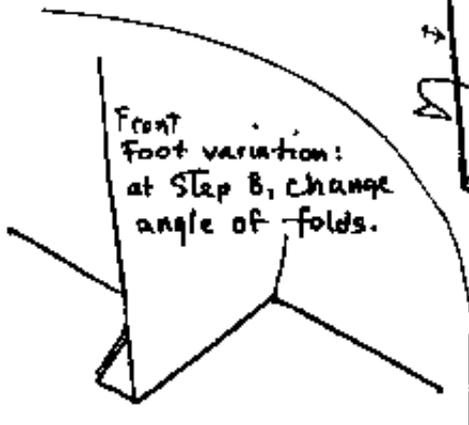

11 Inside reverse left flap. (enl. detail)

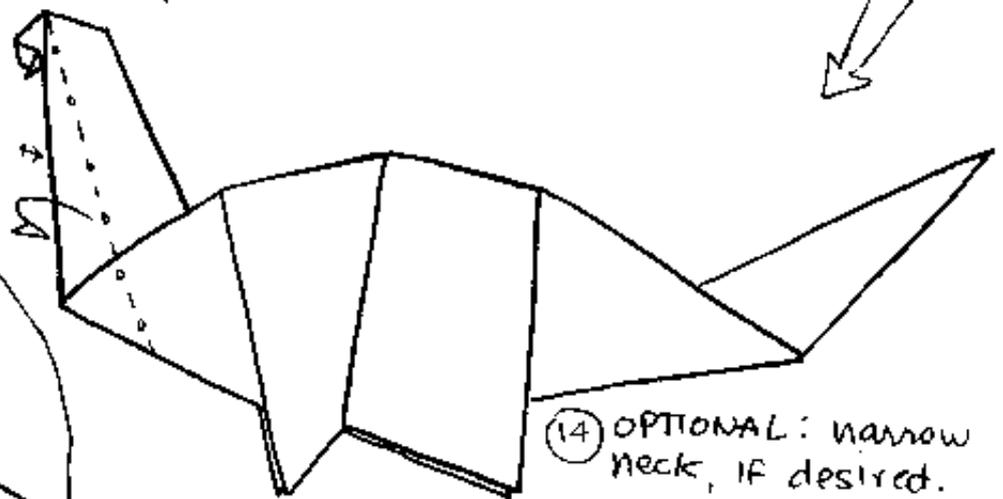

12 Crimp with 2 ORFs.

13 result

Front Foot variation: at Step 8, change angle of folds.

14 OPTIONAL: narrow neck, if desired.
