

TURKEY

Duo-color paper in charcoal black and pale pink would best suit this model, but I've never seen any. The legs, head, beak & throat show the underside of a square of kami. A $9\frac{1}{2}$ " square yields a $4\frac{1}{2}$ " tall turkey. Start with a preliminary fold, body color out.

99

① Petal-fold.

② Flip model over.

③ Lift near flap.

④ VF as if for step 1, but only layer shown.

⑤ Line up existing small crease with new folded edge and flatten.

⑦ VF peak to a point below AB. Tilt model.

⑥ Repeat 3-5 on right.

⑧ Lift wide flap C and crease only as far as shown.

⑨ VF near layer to bisect long flap as far as hidden edge X, then out to corner Y. Replace C & repeat 8+9 on opposite flap, holding C to left.

10

- a) Flatten between Xs.
- b) VF corner C.

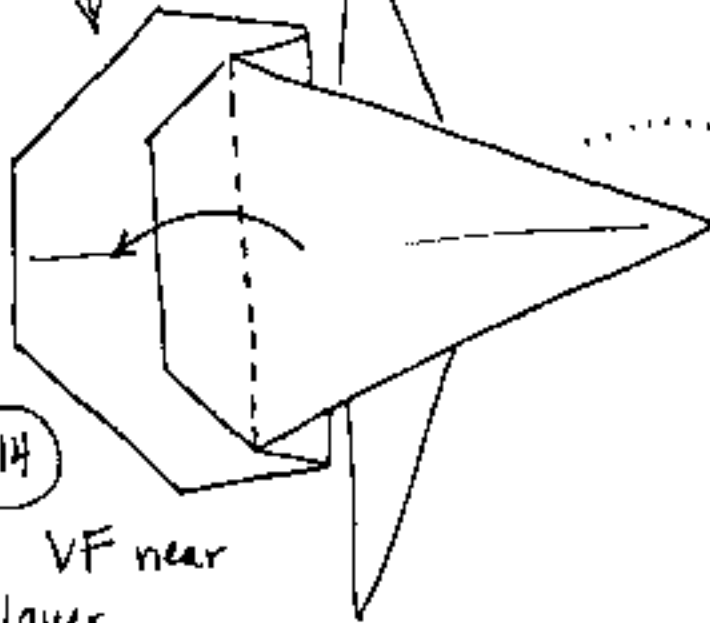

11

Note that the near flap D (leg) has 3 edges. 1 RF between this flap's two far edges. Repeat opp.

13

Flip over.

14

VF near layer.

12

1 RF; repeat opp. leg.

15

1 RF near flap on each leg.

Turkey, p. 3

16
VF so edge E
of leg lines up w/
small edge G. Repeat opp.
(Upper leg shows result).
Unfold and ORF on creases.

17 VF
legs back to
right (Upper one shows result). Then
ORF on the pre-crease so both
surfaces of leg show inner color.

19
a) Bring right
tip to folded edge + pinch.
b) Pinch lower edge just to
right of leg.

18
Return
flap to right.

20
MF model in half.

21
ORF between pinches.

Turkey, p. 4

22

Note 3 edges in front.
 a) Pre-crease, then carefully, without tearing, ORF between layers on far side.
 b) IRF feet so inner color shows on each near surface.

enlarged detail

23

Pre-crease, ^{w/ hinge fold} then carefully, ORF between the layers on the near side

27

a) Round edge of tail with 4 small IRFS.
 b) Push in to make body 3-D, pinching folds lightly.
 c) Push in + bring edge of tail upright.

26 IRF

25 IRF

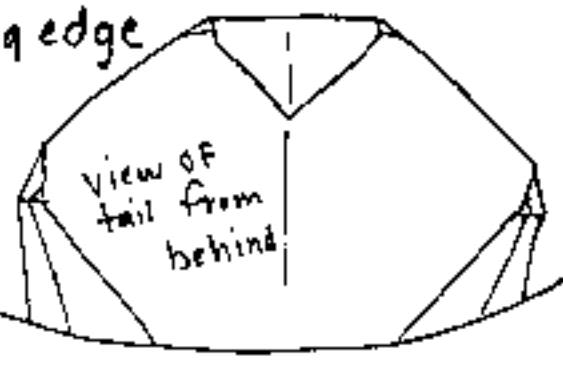

24 IRF

28

Stand model up, adjusting feet as nec.

To use turkey on a greeting card, ignore 27 b+c. Glue flat model to card.
